Dear Mr. Khan

Attached you will find the State Of California Water Quality Control Board's comments on imidacloprid. The online submittal system is not working, and when hitting submit with attachments an error message is received. This is the same problem we had with a prior submittal on pyrethroids. I have not had a reply from the Federal help desk either. I'm hoping these attachments reach you. Please reply so I know you have received them today.

Sincerely,

Rich Breuer
Environmental Program Manager
Division of Water Quality
State Water Resources Control Board
